Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Patriotism: do you have it? How does one express it? Is it worth it? The Singapore Trilogy—consisting of Are You There, Singapore?, One Year Back Home and Changi—has raised questions since the seventies about nationhood that we are still asking today. Influential in steering early English-language theatre in Singapore away from its colonial roots, Robert Yeo conceived of characters that are believably local in

speech, thought and behaviour, and provided a dramatic platform for the dialogue of politically sensitive issues. Yeo's trilogy continues to link to an exciting time of sociopolitical flux in Singapore's history, and engages by provoking us to explore the meaning of being Singaporean. The acclaimed author recounts his epic journey across Europe and Asia in this international bestselling classic of travel literature: "Compulsive reading" (Graham Greene). In 1973, Paul Theroux embarked on a four-month journey by train from the United Kingdom through Europe, the Middle East, and Southeast Asia. In *The Great Railway Bazaar*, he records in vivid detail and penetrating insight the many fascinating incidents, adventures, and encounters of his grand, intercontinental tour. Asia's fabled trains—the Orient Express, the Khyber Pass Local, the Frontier Mail, the Golden Arrow to Kuala Lumpur, the Mandalay Express, the Trans-Siberian Express—are the stars of a journey that takes Theroux on a loop eastbound from London's Victoria Station to Tokyo Central, then back from Japan on the Trans-Siberian. Brimming with Theroux's signature humor and wry observations, this engrossing chronicle is essential reading for both the ardent adventurer and the armchair traveler. *Songs of Ourselves: the University of Cambridge International Examinations Anthology of Poetry in English* contains work by more than 100 poets from all parts of the English speaking world. For early chapter book readers who are ready for something longer, the *Not-So-Impossible Tales* are packed with silly humor, action, and larger-than-life fun. "[A] sly and dashing tale. . . Readers' ribs aren't the only ones that get a vigorous tickle." —Kirkus Reviews "A delightfully told, beautiful tale of nautical hairdressing, saltwater primates and sarcastic seaweed—this is my kind of book!" —Chris Riddell, award-winning co-creator of the *Edge Chronicles* From the Hardcover edition. This second edition of GCSE Biology is in line with the requirements of the National Curriculum and the revised GCSE Science: Biology syllabuses. Key features include new chapters on personal health, biotechnology and disease; updated questions; redesigned layout; and increased use of colour. Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects

than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.
