How Come? Mar 05 2021
Fact-filled, fun-filled, as interesting to parents as it is to kids, the How Come? series is the trusted source for lively, clear answers to kids' science queries. Now the best questions and answers from all three books—How Come?; How Come? Planet Earth; and How Come? In the Neighborhood—have been revised, updated, freshly illustrated in full color, supplemented with twenty

completely new questions, and combined into one bigger, better volume. How Come? explains, in fascinating detail, more than 200 mysteries and phenomena in the world around us. These are the questions that pique kids' curiosity—and stump parents. When it rains, does running (rather than walking) to the nearest shelter really keep you any drier? How can a stone skip across a pond (instead of sink)? If the Earth is spinning,

why can't we feel it? Why don't we fly off? Why do elephants have trunks? And the all-time classic, Why is the sky blue? (Sunlight has a hidden rainbow of colors, and air molecules scatter blues the most—sending bright blue light down to Earth.) The text is clearly written, engaging, and accessible. It's for every kid who wants to know—and every grown-up who simply doesn't know.

2020 Drawn from the archives of the Charles M. Schulz Museum, an in-depth look at Peanuts with a “wealth of original art” (The New York Times). Charles M. Schulz believed that the key to cartooning was to take out the extraneous details and leave in only what’s necessary. For fifty years, from October 2, 1950, to February 13, 2000, Schulz wrote and illustrated Peanuts, the single most popular and influential comic strip in the world. In all, 17,897 strips were published, making it “arguably the longest story ever told by one human being,” according to Robert Thompson, professor of popular culture at Syracuse University. For Only

What’s Necessary: Charles M. Schulz and the Art of Peanuts, renowned designer Chip Kidd was granted unprecedented access to the extraordinary archives of the Charles M. Schulz Museum and Research Center in Santa Rosa, California. Reproducing the best of the Peanuts newspaper strip, all shot from the original art by award-winning photographer Geoff Spear, Only What’s Necessary also features exclusive, rare, and unpublished original art and developmental work—much of which has never been seen before. “Glorious...equal parts museum and monument, a masterwork of curatorial rigor and an affectionate

I Know My Own Heart Jun 27 2020 Upon publication, the first volume of Anne Lister's diaries, *I Know My Own Heart*, met with celebration, delight, and some skepticism. How could an upper class Englishwoman, in the first half of the nineteenth century, fulfill her emotional and sexual needs when her sexual orientation was toward other women? How did an aristocratic lesbian manage to balance sexual fulfillment with social acceptability? Helena

Whitbread, the editor of these diaries, here allows us an inside look at the long-running love affair between Anne Lister and Marianna Lawton, an affair complicated by Anne's infatuation with Maria Barlow. Anne travels to Paris where she discovers a new love interest that conflicts with her developing social aspirations. For the first time, she begins to question the nature of her identity and the various roles female lovers may play in the life of a gentrywoman. Though unequipped with a lesbian vocabulary with which to describe her erotic life, her emotional conflicts are contemporary enough to speak to us all. This book will satisfy

the curiosity of the many who became acquainted with Lister through *I Know My Own Heart* and are eager to learn more about her revealing life and what it suggests about the history of sexuality.

Wild Oct 24 2022 Come face to face with our vanishing wildlife. Using unique Photicular technology, *Wild* brings to vivid life the animals who are under threat of extinction. It turns abstract numbers and names into touching and unforgettable images. From the cover panda, lazily munching on leaves, to an albatross swooping its magnificent wings, to the hovering bumblebee, among the most critical of threatened

animals in terms of its effect on the global food supply, *Wild* captures eight endangered animals in living motion. We see gorillas at play, a rhinoceros and its baby trotting across the savanna, a pangolin skittering along the landscape, an elephant bathing in a river. An opening essay explores the environmental and economic threats to animal populations and how conservationists are working to slow—and when they can, reverse—the damage. Profiles of each animal accompany the images. *Wild* joins four other books in the Photicular series—*Safari*, *Ocean*, *Polar*, and *Jungle*. *Human Anatomy in Full Color* Sep 23 2022 Twenty-five

exceptionally clear and detailed anatomical plates — with labels and extensive captions — depict the skeleton, spine, bones, joints, skull, muscles, skin and limbs; heart, stomach, other organs; much more.

Polar Feb 28 2023 Take a stunning journey to the ends of the earth through the colorful, fluid motion of Photicular® technology. A phenomenon first seen in the bestsellers *Safari* and *Ocean*, Photicular technology uses sliding lenses and video imagery to display realistic living motion in the pages of a book. It's like a movie in your hand. Penguins waddle in their irresistibly happy way. A walrus lumbers across the snowy landscape.

There's a polar bear with her lively cubs. A beluga whale, breaching. A team of sled dogs sprinting directly at the viewer. And the miracle of the Northern Lights, shimmering like a silk rainbow through the star-filled night. National Geographic writer Carol Kaufmann brings the reader along on a voyage to the North and South Poles, and writes a lively and informative essay for each image, including vital statistics for each animal, such as their size, range, habitat, and more.

Antarctica Dec 14 2021

Updated throughout, the 7th edition of Bradt's Antarctica: a Guide to Wildlife is the most practical guide to the flora and fauna available for those 'going south'. Celebrating the amazing and often unique species of this spectacular environment, the title features chapters on the region's famous whales and penguins,

and also on lesser known species such as skuas and sheathbills, with full coverage of plumage and identification. Each chapter is accompanied by vibrant illustrations from Dafila Scott to help bring species to life. Tony Soper's immaculate and engaging text remains the indispensable choice for the intrepid wildlife enthusiast. Antarctica's wildlife is under threat. The Southern Ocean is warming and the most obvious effect is on the continental ice shelves. Spectacular retreats and monster carvings from the west coast of the peninsula have been seen in recent decades. Less ice means fewer krill, which depend on the ice-edge

for the algae which nourish them. In turn, this will impact on seal and whale numbers. In the case of penguins, while kings and macaronis, for instance, are doing well, the magnificently adapted and truly Antarctic species, Adélie and emperors, are in decline. In the case of emperors, maybe by as much as 50%. Bradt's Antarctica not only helps you to identify and understand species and habitats, it also explains the issues faced by this extraordinary continent, regarded by many as one of the most precious places on the planet.

The Lay of the Land Jun 20 2022 A spiritually uplifting and

beautiful designed visual memoir by the hugely popular photographer on Instagram, Joe Greer, combining thoughtful essays and more than 100 gorgeous landscape photos—half fan favorites, and half never-before-seen. “Each photograph really does come down to a split second when you decide to freeze that moment in time. . . . You ask yourself what the story is that you want to tell, and let the rest unfold: Click.”—from the introduction Joe Greer never imagined he would become a photographer. Raised in Florida by an aunt and uncle after his mother's death when he was four, Joe had a seemingly normal childhood,

spending summers at church camp and dreaming of going to college. But nearly fifteen years later, the ground shifted beneath his feet when he discovered a family secret that would impact the rest of his life. Trying to make sense of that revelation and what it meant for his future, Greer set his sights on becoming a pastor at Spokane's Moody Bible Institute. There, he discovered Instagram—and a passion for photography. His pictures of the lush, wild beauty of the Pacific Northwest landscape attracted a large following that has grown to more than three quarters of a millions fans and continues to expand. *The Lay of the Land* is Joe's story in words

and pictures. In this stunning compendium, he reflects on the trauma of his early life and what photography has taught him: how to find his light; how to slow down; how to appreciate the world around him, a reverence for the nature world that both nurtures and amplifies his creativity and faith; how to love—his photography led him to his wife, Madison—and how to heal. For Joe, photography has been a way to find purpose, better understand his faith, and express himself. Though he began with landscapes, meeting his wife sparked a new love of portraiture, and he turned to making photos of street scenes that explored his

complicated feelings about family. A love letter to the natural world, to faith, and to finding your calling in the most unexpected places, *The Lay of the Land* is a window into the beautiful mind and heart of one of the internet's favorite photographers. Moving and inspiring, it is a creative and spiritual journey that offers lessons on life and living. As Greer reminds us all, whatever it is you want, it's up to you to make the moment (and the photograph).

Readers, as if on African safari, encounter eight

wild animals that come alive using never-before-seen Photocentric technology. Each full-color image is like a 3-D movie on the page, delivering a rich, fluid, immersive visual experience. The result is breathtaking. The cheetah bounds. The gazelle leaps. The African elephant snaps its ears. The gorilla munches the leaves off a branch. It's mesmerizing, as visually immediate as a National Geographic or Animal Planet special. Accompanying the images is *Safari*, the guide: It begins with an evocative journal of a safari along the Mara River in Kenya and interweaves the history of safaris. essay and an at-a-glance list of important facts. It's the romance of being on safari—and the thrill of seeing the animals in motion—in a book unlike any other. *The Bee Book* May 19 2022 The Bee Book shows you step-by-step how to create a bee-friendly garden, get started in beekeeping, and harness the power of honey for well-being. Kliban's *Cat, All I Need to Know I Learned from My Cat*, and *Bad Cat*, comes a new book that answers the question all cat lovers ask: How do I make my cat like me? *97 Ways to Make a Cat Like You* is the perfect interactive guide to these mysterious, fickle, seemingly aloof—yet really, just particular—pets. Paired with a full-color photograph of friendly, extroverted, happy cats (in case you've forgotten what a cat looks like when he "likes" you), the 97 inspired,

occasionally silly but always behaviorally-based tips and tricks prove that when a cat is treated right, he or she will respond in kind. Within reason. There's the "Eye on the Ball"—record a tennis match or a Ping-Pong game on TV to play back for your cat when he needs a bit of exercise. "Cat Burrito"—wrap your cat in a towel, burrito-style, which is particularly good for anxious pets or trips to the vet. The "Boing, Boing!"—wind pipe cleaners around a pencil in a spiral shape to create springs. Carefully slide off the pencil so the spirals go "boing" when pressed. The classic "Tickle, Tickle"—tickle Kitty under her chin and softly say "gitchy,

gitchy, gitchy” in your highest-pitched voice. And for the cat owner willing to go the distance, the “There’s No Business Like Show Business”—practice your best Ethel Merman by belting out

favorite show tunes for your cat. Kitty won’t care if you’re off-key and she’ll enjoy the stimulation.
