design and implementation of power factor corrected circuits Apr 06 2021 web may 12 2023 this paper investigates the design and implementation of a new single phase sensorless power factor corrected pfc circuit here the inductor current sensor and its sensing circuit are removed as a result the cost and volume of the pfc circuit are effectively reduced

non traditional design of dynamic logic gates and circuits with Jan 04 2021 web may 19 2023 abstract in this paper we propose a non traditional design of dynamic logic circuits using fully depleted silicon on insulator fdsoi fet fdsoi fet allows the threshold voltage v_t to be adjustable i.e. low v_t and high v_t states by using the back gate bias our design utilizes the front and back gates of an fdsoi fet as the
