This book represents a major milestone in the endeavour to understand how communication is impacting on the fashion industry and on societal fashion-related practices and values in the digital age. It presents the proceedings of FACTUM 19, the first in a series of fashion communication conferences that highlights important theoretical and empirical work in the field. Beyond documenting the latest scientific insights, the book is intended to foster the sharing of methodological approaches, expand the dialogue between communications' studies and fashion-related disciplines, help establish an international and interdisciplinary network of scholars, and offer encouragement and fresh ideas to junior researchers. It is of high value to academics and students in the fields of fashion communication, fashion marketing, visual studies in fashion, digital transformation of the fashion industry, and the cultural heritage dimension of fashion. In addition, it is a key resource for professionals seeking sound research on fashion communication and marketing. Fans of Sophie Kinsella's sparkling humor will love her first ever illustrated series for young readers about the charming adventures of a mother-daughter fairy duo! Ella Brook can't wait to grow up, because one day she will become a fairy and have her own sparkly wings and a teacher on Fairy Tube, just like her mom! Until then, Ella has to learn by watching her mom in action. But sometimes spells go wrong, and Ella's mom can never seem to remember the right magic codes on her Computawand. A lot of the time, it's up to Ella to come to the rescue. Does she have what it takes to be a fairy one day? Or will there be more glitches than glitter? Perfect for readers of *The Secret Life of Bees* and *The Help*, a perceptive and searing look at Apartheid-era South Africa, told through one unique family brought together by tragedy. Life under Apartheid has created a secure future for Robin Conrad, a ten-year-old white girl living with her parents in 1970s Johannesburg. In the same nation but worlds apart, Beauty Mbali, a Xhosa woman in a rural village in the Bantu homeland of the Transkei, struggles to raise her children alone after her husband's death. Both lives have been built upon the division of race, and their meeting should never have occurred...until the Soweto Uprising, in which a protest by black students ignites racial conflict, alters the fault lines on which their society is built, and shatters their worlds when Robin's parents are left dead and Beauty's daughter goes missing. After Robin is sent to live with her loving but irresponsible aunt, Beauty is hired to care for Robin while continuing the search for her daughter. In Beauty, Robin finds the security and family that she craves, and the two forge an inextricable bond through their deep personal losses. But Robin knows that if Beauty finds her daughter, Robin could lose her new caretaker forever, so she makes a desperate

decision with devastating consequences. Her quest to make amends and find redemption is a journey of self-discovery in which she learns the harsh truths of the society that once promised her protection. Told through Beauty and Robin's alternating perspectives, the interwoven narratives create a rich and complex tapestry of the emotions and tensions at the heart of Apartheid-era South Africa. Hum If You Don't Know the Words is a beautifully rendered look at loss, racism, and the creation of family. Times are tough for Santa. He's tightened his belt, made the reindeer redundant and now it's time to get a second job. But finding work is not easy at all, even if you're Santa – he tries being a waiter, a party entertainer, and even works in a call centre. He finally finds the perfect job to be useful to the community – the bin man! Santa discovers that waste can conceal wonderful gifts, and he is soon back on his sled delivering toys made from recycled materials. When Santa finds some lost letters from years ago in the bin, begging to meet him, he sets out to find their owner. Will he be able to find them and finally grant their wish before Christmas Day? Hilarious and heartwarming, Santa Gets a Second Job is the perfect present for Santa fans of all ages from Michele D'Ignazio and Sergio Olivotti. One day Jane was a comedy scriptwriter with a successful career in British TV and bright hopes for her future in Hollywood. The next she's stranded in La La Land, reduced to interviewing celebrities for British magazines. 2016 Governor General's Literary Award Finalist 2017 Kobo Emerging Writer Prize Winner 2017 Joe Shuster Award Nominee Teva Harrison was diagnosed with metastatic breast cancer at the age of 37. In this brilliant and inspiring graphic memoir, she documents through comic illustration and short personal essays what it means to live with the disease. She confronts with heartbreaking honesty the crises of identity that cancer brings: a lifelong vegetarian, Teva agrees to use experimental drugs that have been tested on animals. She struggles to reconcile her long-term goals with an uncertain future, balancing the innate sadness of cancer with everyday acts of hope and wonder. She also examines those quiet moments of helplessness and loving with her husband, her family, and her friends, while they all adjust to the new normal. Ultimately, In-Between Days is redemptive and uplifting, reminding each one of us of how beautiful life is, and what a gift. "Built on her ... These conference proceedings are the output of one of the first academic events of its nature happening globally, targeting fashion from a communication sciences perspective, including, in a broad sense, cultural heritage studies and marketing. The chapters present theoretical and empirical interdisciplinary work on how various communication practices impact the fashion industry and on societal fashion-related practices and values. The special focus of this volume is how digital transformation is changing the field and its utility to practitioners. Using these academic insights, practitioners can understand the core causes and reasons for trends and developments in the field of fashion communication and marketing. Lewis (English, Bethany College) studies Browning's religion as poetry and her poetry as religion, interpreting her literary life as an arduous spiritual quest. Using insights from contemporary feminist thought, she argues that Browning's religious assumptions and insights range from the conventional to the iconoclastic and that her political and social ideology are consistent in light of her spiritual quest. Draws on Browning's most admired poetry as well as her early poems and her political works, and compares her ideology to that of early feminists, conservatives, and male Victorian poets. The protagonists of Stael's Corinne and Sand's Consuelo combine attributes of the goddess Athena, the Virgin Mary, Virgil's Sibyl, and Dante's Beatrice. Lewis illustrates how the resulting Corinne/Consuelo effect is exhibited in scores of English artist-as-heroine narratives, particularly in the works of these four prominent writers who most consciously and elaborately allude to the French literary matriarchs." Traditional knot and interlace patterns, combined to form uniquely striking contemporary designs. Ever since her ground-breaking book *Viking Patterns for Knitting* was published, Elsebeth Lavold has been recognized as one of the world's leading experts on cabling. It was within the pages of her international bestseller—described as “an indispensable milestone in 20th century knitting literature”—that Lavold first introduced the world to her own innovation: using lifted increases to create interlace patterns, and bringing new life to the ornamental heritage of the Vikings as adornment on modern knitwear. In the years since, Lavold has sought new ideas and “design cousins” to Viking patterns to explore with her needles, and has undertaken a fascinating journey through archives, museums, libraries, and the internet. In more than a decade of continued research, she has studied cultures from all over the globe in search of similar types of ornamental expression, creating the foundation for this exciting new book: a glorious collection rich in imagery, history, patterns, and designs. Dozens of different sources of inspiration, catalogued and placed within their cultural and historical context, from all around the world. Complete, step-by-step instructions for an abundance of fresh and stunningly beautiful knit designs, presented in the book with full-color photographs. Lavold's own painstaking analysis of a huge number of interlace motif types, displayed in both swatch and chart form, to allow you to compose your own patterns based on her research. William Hazlitt's tough, combative writings on subjects ranging from slavery to the imagination, boxing matches to the monarchy, established him as one of the greatest radicals of his age and have inspired journalists and political satirists ever since. Twenty-five-old Lacey Whitman is blindsided when she’s diagnosed with the BRCA1 gene mutation: the “breast cancer” gene. Her high hereditary risk forces a decision: increased surveillance or the more radical step of a preventative double mastectomy. Lacey doesn’t want to lose her breasts. For one, she’s juggling two career paths. Secondly, small-town Lacey’s not so in touch with her sexuality: she doesn’t want to sacrifice her breasts before she’s had the chance to give them their hey-day. To help her make her choice, she (and her friends) creates a “boob bucket list”: everything she wants do with and for her boobs before a possible surgery. This kicks off a year of sensual exploration and sexual entertainment for the quick-witted Lacey Whitman. The Bucket List cleverly and compassionately explores Lacey’s relationship to her body and her future. Both are things Lacey thought she could control through hard work and sacrifice. But the future, it turns out, is more complicated than she could ever imagine. Featuring the pitch-perfect “compulsively delicious” (Redbook) prose of *The Regulars*, *The Bucket List* is perfect for fans of Amy Poepel and Sophie Kinsella. From the authors of *The Whole-Brain Child* and *No-Drama Discipline*, an indispensable guide to unlocking your child’s innate capacity for resilience, compassion, and creativity. When facing contentious issues such as screen time, food choices, and bedtime, children often act out or shut down, responding with reactivity instead of receptivity. This is what New York Times bestselling authors Daniel J. Siegel and Tina Payne Bryson call a No Brain response. But our kids can be taught to approach life with openness and curiosity. When kids work from a Yes Brain, they’re more willing to take chances and explore. They’re more curious and imaginative. They’re better at relationships and handling adversity. In *The Yes Brain*, the authors give parents skills, scripts, and activities to bring kids of all ages into the beneficial “yes” state. You’ll learn • the four fundamentals of the Yes Brain—balance, resilience, insight, and empathy—and how to strengthen them • the key to knowing when kids need a gentle push out of a comfort zone vs. needing the “cushion” of safety and familiarity • strategies for navigating away from negative behavioral and emotional states (aggression and withdrawal) and expanding your child’s capacity for positivity *The Yes Brain* is an essential tool for nurturing positive potential and keeping your child’s inner spark glowing and growing strong. Praise for *The Yes Brain* “This unique and exciting book shows us how to help children embrace life with all of its challenges and thrive in

the modern world. Integrating research from social development, clinical psychology, and neuroscience, it's a veritable treasure chest of parenting insights and techniques."—Carol S. Dweck, Ph.D., author of *Mindset* "I have never read a better, clearer explanation of the impact parenting can have on a child's brain and personality."—Michael Thompson, Ph.D. "Easily assimilated and informative, the book will help adults enable children to lead physically and emotionally satisfying and well-rounded lives filled with purpose and meaningful relationships. Edifying, easy-to-understand scientific research that shows the benefits that accrue when a child is encouraged to be inquisitive, spirited, and intrepid."—Kirkus Reviews For more than twenty years, Dr. Holland has pioneered the study of psychological problems of cancer patients and their families -- whom she calls "the real experts." In *The Human Side of Cancer*, she shares what she has learned from all of them about facing this life-threatening illness and what truly helps along the cancer journey. This book is the next best thing to sitting in Dr. Holland's office and talking with her about the uncertainty and anxiety elicited by this disease. And it is a book that inspires hope -- through stories of the simple courage of ordinary people confronting cancer. A generation ago, fewer than 5 percent of girls started puberty before the age of 8; today, that percentage has more than doubled. Early puberty is not just a matter of physical transformation—it's also deeply psychological, with a myriad of effects that can put a girl at higher risk for behavioral problems and long-term health challenges. In this reassuring and empowering guide, Louise Greenspan, MD, and Julianna Dearthoff, PhD—two leading experts on the root causes and potential consequences of early puberty in girls—deliver vital advice on how to prevent and manage early puberty. They explain surprising triggers—from excess body fat to hormone-mimicking chemicals to emotional stressors in a girl's home and family life—and offer highly practical strategies, including how to limit exposure to certain ingredients in personal care and household products, which foods to eat and which to avoid, ways to improve a child's sleep routine to promote healthy biology, and more. *The New Puberty* is an engaging, urgently needed road map to helping young girls move forward with confidence, ensuring their future well-being. It cares little for class, creed or color. Its patients are literally everywhere. When Laura Holmes Haddad was diagnosed, she discovered shelf upon shelf of overly-earnest, somber, gray survival books, and knew there had to be a better way. This *Is Cancer* is the thoughtful, informative fabulous-looking result for those who prefer

their pathos with equal parts humor and reality and a touch of flair. A “what to expect when you’re expecting” book for the diagnosis you don’t want but are stuck with, *This Is Cancer* is the book that patients keep in their “heading to the hospital bag,” because it’s the only one that tells them what’s going on and keeps them company. Including such useful snippets as: • There is no limit to what you will put yourself through when told it might save your life. • Stay away from the Internet. And don’t let anyone tell you “what they looked up” about your diagnosis. • You’ll be surrounded by people but you’ll feel lonely, and alone, sometimes. • Lexapro is Tylenol for the soul. • If you don’t like your doctor(s), find new ones. You will feel somewhat at the mercy of them, like they hold the key to your mortality, but in fact more than one doctor can potentially save you and some are nice and some are mean. Whether you or your loved ones want a primer full of useful information in an easy to reference format or a friendly and comforting read, the honest, grave, and mordantly funny stories and tips from young survivors will bring you the real intel and advice that you need most during this tremendously difficult time. In recent decades, new endogenous growth theory has become popular but the ideas are not new. They go back at least as far as Adam Smith, and the subsequent contributions made notably by Alfred Marshall and Allyn Young. This book critically discusses and provides an historical perspective to the entire spectrum of endogenous growth theories starting with Adam Smith and ending with Paul Romer. It fills an important gap in the literature. While contributions of individual authors are readily available, there is no comprehensive study on the subject covering such a vast ground, critically discussing these authors in a comprehensive framework. It collates all the arguments and economic viewpoints in one collection, providing both the seasoned economist and a graduate economist with a critical comparison of origin, mechanisms, conclusions, and policy implications of these models. *Stars and Masculinities in Contemporary Italian Cinema* is the first book to explore contemporary male stars and cinematic constructions of masculinity in Italy. Uniting star analysis with a detailed consideration of the masculinities that are dominating current Italian cinema, the study addresses the supposed crisis of masculinity. In this “powerful and unflinching page-turner” (New York Times), a healthcare journalist examines the science, history, and culture of breast cancer. As a health-care journalist, Kate Pickert knew the emotional highs and lows of medical treatment well -- but always from a distance, through the stories of her subjects. That is, until she was unexpectedly diagnosed with an aggressive type of breast cancer at the age of 35. As she underwent more than a year of treatment, Pickert realized that the popular understanding of breast care in America bears little resemblance to the experiences of today’s patients and the rapidly changing science designed to save their lives. After using her journalistic skills to navigate her own care, Pickert embarked on a quest to understand the cultural, scientific and historical forces shaping the lives of breast-cancer patients in the modern age. Breast cancer is one of history’s most prolific killers. Despite billions spent on research and treatments, it remains one of the deadliest diseases facing women today. From the forests of the Pacific Northwest to an operating suite in Los Angeles to the epicenter of pink-ribbon advocacy in Dallas, Pickert reports on the turning points and people responsible for the progress that has been made against breast cancer and documents the challenges of defeating a disease that strikes one in eight American women and has helped shape the country’s medical culture. Drawing on interviews with doctors, economists, researchers, advocates and patients, as well as on journal entries and recordings collected over the author’s treatment, *Radical* puts the story of breast cancer into context, and shows how modern treatments represent a long overdue shift in the way doctors approach cancer -- and disease -- itself.
